主旨: Responses of Public consultation on the proposed subsidiary legislation under the Copyright Ordinance (Cap. 528)  
類別: Internet Email

Dear CEDB,

In response to the Public consultation on the proposed subsidiary legislation under the Copyright Ordinance (Cap. 528), Hong Kong Shue Yan University Library has two points of view as following:

1. Since some copyrighted works can't be separated, and be used in the academic activities individually, the 10% limitation may not be practical to every scenario. More guidance may be needed for the daily library operations;
2. The consultation paper concentrate to the traditional paper-based material, images and videos, but does not include new copyrighted materials types, for example: 3D Objects, GPS geographical data and research data set etc. It is highly recommended to include such new copyrighted materials types.

Many thanks.

Best Regards,  
Joe

**Joe Chow**

University Librarian, Hong Kong Shue Yan University
